REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

With regard to claim 1, the prior art fails to teach or suggest applicant's recited heat-resistant plastic tube comprising: at least one layer consisting essentially of a polyester-based elastomer including at least one of a polyester-polyester block copolymer with a polyester hard segment component made of naphthalene dicarboxylic acid and a soft segment component and a polyester-polyether block copolymer with a polyester hard segment component made of naphthalene dicarboxylic acid and a soft segment component with a bending elastic modulus from 160 MPa to 700 MPa, wherein the tube exhibits a change rate in inner diameter of +/- 2% or less in a dimensional stability performance test, and a change rate in yield strength of +/- 30% or less in a flexibility retainability performance test. Furthermore, based on applicant's remarks of 10/26/07, the phrase "consisting essentially of" excludes the rubber contained in '483 and the examiner agrees with applicant's arguments that '483 teaches away from the exclusion of rubber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
